Heppenheim, 08.06.2026

Zent-Frenger GmbH and Barcol-Air Production GmbH rebrand and join forces under the new name Swegon Operations HEP GmbH

The companies Zent-Frenger GmbH and Barcol-Air Production GmbH will in future operate under the unified name Swegon Operations HEP GmbH. This rebranding marks an important step in the strategic development and integration within the Swegon Group.

The objective of the merger is to bundle expertise, leverage synergies and further strengthen the market position in the field of energy-efficient solutions for a healthy indoor climate. Both companies bring many years of experience and a high level of expertise in the development and production of innovative HVAC systems, particularly in heating, cooling and ventilation.

Swegon Operations HEP GmbH operates a state-of-the-art production centre at its Heppenheim site, combining development, production and operational excellence. Customers will continue to benefit from proven quality, expanded resources, and even closer integration within the international Swegon network.

“With this rebranding, we are creating a clear and unified structure that strengthens the visibility of our affiliation with the Swegon Group while increasing our operational effectiveness,” says Stefan Steckel, Managing Director. “For our customers, continuity in terms of quality, contacts and service will of course remain unchanged.”

The Swegon Group is an international leader in indoor climate solutions, representing sustainable, energy-efficient and comfortable indoor environments. The new organisation further enhances the ability to provide holistic solutions and meet the growing demands for energy-efficient buildings.

The rebranding will have no impact on existing business relationships, contracts or points of contact. All activities will continue seamlessly.
